**Subject:** Microsoft is NOT a Monopoly

Why do people think Microsoft is a monopoly? They're not forcing you to use any of their products. You've got choices like Linux and Macintosh. So what if they bundle IE or a video editing program or Media Player? YOU DON'T HAVE TO USE THEM. It's not like Adobe is going to lose any more money on Premier and MusicMatch is certainly not going to lose any more money. Just because Internet Explorer is bundled with Windows does not mean you have to use it.
